

Release Notes for Pisces version 3.19

Release Date: **September 20, 2012**

Welcome to the latest release of Pisces, version 3.19.

Pisces is a web-enabled .NET software application used by BPA and its Fish & Wildlife program participants to track and manage projects throughout the Columbia River Basin. Pisces allows contractors and BPA project managers to collaborate on project definition and ongoing project management over the internet.

To find out more about what Pisces is and what you can do with it, start here:

Changes in this release include:

Land Acquisition Tracking

This update includes a number of enhancements and changes to help BPA personnel better track land acquisitions. Stakeholder feedback indicated a need to improve processes related to pre-acquisition workflow and post-acquisition monitoring. Non-BPA users will see little change in the system except for some new data (e.g., TractID and Timeframe) that are entered by BPA employees in BPA-internal statements of work.
